The results of the contest will be presented together with works of the poster biennial arts exhibition **Youth in Europe** (2000 – 2014) where students of design schools of European countries participated commenting on present time topics.

In Germany and neighboring European countries, young people are concerned about the future of our planet. This includes both the relationships between people and their behavior toward nature.

The images of burning cities and the fear of refugees that enter our world every day via the media shake us all. For most people in Europe, who until now have only known wars from history books, the world has collapsed. Many are overwhelmed by a feeling of powerlessness, that they cannot do anything about it, that is, they are powerless.

We, the initiators of this competition, call upon you:

Send signs against violence, egoism and indifference with artistic means! Set a sign for a peaceful and social coexistence and for the preservation of our livelihood!

With this poster competition we challenge you:

Express your thoughts and feelings!

**Develop your own bold and imaginative image ideas! Convince with a great idea and a great form!
Touch people's hearts!**

Conditions for participation

The format of the submitted posters must be 70 x 50 cm (portrait format), but at least A3. The works can be elaborated as collage, painting or graphic.
